

# Communication and Dissemination Report

CATALYST

European VET Excellence Centre  
for Leading Sustainable Systems  
and Business Transformation

Project reference number: 101056114

**Project duration:** 01.06.2022 – 31.05.2026

**EU funding instrument:** Erasmus+

**Partner countries:** North Macedonia, Austria, Germany, Greece, Portugal

**Target groups:** 1. SMEs and professionals, 2. Students and high school students, 3. Business and professional associations, 4. Educational organisations, 5. Government agencies, ministries, and public enterprises, 6. Researchers

**Grant holder:** 16 partners (see Grant Agreement)

**Coordinator:** PRIVATE SCIENTIFIC INSTITUTION, INSTITUTE FOR RESEARCH IN ENVIRONMENT, CIVIL ENGINEERING AND ENERGY, SKOPJE (IECE), North Macedonia

“Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA).

Neither the European Union nor EACEA can be held responsible for them.”

## Executive Summary

The objective of this deliverable is to summarize all implemented dissemination and communication activities carried out during the CATALYST project. This includes events like conferences and workshops, as well as newsletters, blog entries, and social media postings.

This document illustrates the results of a strategy to communicate and disseminate (information, materials and knowledge) of the project. By defining the aims of the dissemination actions, identifying target groups, describing communication tools and channels, and detailing partner-specific dissemination plans, the project consortium members ensured that the European Commission was able to keep track of the project in a verifiable manner. In order to achieve successful dissemination and effective communication, the CATALYST project implemented a multi-channel approach including offline and online activities to foster stakeholder dialogue.

The key findings of the project were made available for download and re-use through the project's web portal and were also shared through the open and interactive CATALYST platform. A set of communication materials, including project flyers and brochures, was produced and distributed at events to raise awareness about the project.

In doing so, the main objectives were to increase:

- ✓ **Awareness:** Ensuring that all relevant stakeholders became aware of the aims, actions, and achievements of the CATALYST project, as well as the available resources and opportunities in the context of research, development, and innovation.
- ✓ **Engagement:** Through a variety of initiatives, including the open interactive CATALYST platform, national and international events, workshops, and consultations, the project aimed to attract and engage professionals, students, SMEs, and VET trainers.
- ✓ **Participation:** Facilitating access to CATALYST “Enable and Inspire” outputs, including opportunities for new partnerships, which were key to stimulating active involvement.

Dissemination and communication activities within CATALYST were geared towards both promoting the outcomes and work of the consortium itself and assisting and coordinating dissemination and communication efforts at national and international level. The overall goal was to support the establishment of CATALYST partnerships and new alliances, helping the initiative grow into a unique and attractive opportunity for both universities and companies.

## 1. Introduction

### 1.1. Brief description of the CATALYST project

The **CATALYST project “European VET Excellence Centre for Leading Sustainable Systems and Business Transformation”** was designed with a strong vision and motivation to contribute to the realisation of the European Green Deal and the new Industrial and SME Strategies. The **main goal** was the **establishment of CATALYST Centres of Vocational Excellence in 5 countries** to give support, create an educational offer to tackle personal and organisational development, and to embrace transformation in SMEs, enabling and inspiring them to re-think and re-design their business models, co-creating and sharing between educational and business organisations. The project fostered innovation and applied knowledge in approaches of learning and a tailor-made VET program via the **“Enable component”**, as well as support of SMEs to create sustainable businesses via the **“Inspire component”**.

#### **The main project outputs are:**

1. Establishing 5 CoVEs and the CATALYST Network to anchor the European VET eco-system;
2. The development of 70 VET courses for up-skilling professionals and students (Enable component);
3. Co-creation and dissemination of applied knowledge inspiring business-education partnerships involving students, professionals and SMEs (Inspire component);
4. The creation of the CATALYST Platform which united all CoVEs on European level;
5. Implementation of VET trainings, pilot-projects with SMEs and applied joint research projects in selected sectors
6. Raising awareness of the CATALYST CoVE potential and increasing the demand and attractiveness of VET.

Online engagement played a significant role in generating qualitative insights into stakeholder interest in the project and contributed to achieving the objectives of the dissemination strategy, particularly in strengthening collaboration between academia and industry. To build and maintain an active community, the consortium continuously promoted the project and raised awareness through digital communication activities. These efforts focused on attracting stakeholders, encouraging interaction, and fostering active participation and collaboration within the CATALYST network. Further activities were focused on learning opportunities, applied joint research projects, innovative training methodologies and tools and support for SMEs on relevant topics. The desired impact of the project was the established CoVEs to be a ‘catalyst’ on national, regional and European level, ‘enable’ change and ‘inspire’ and transformation of individuals and SMEs toward more sustainable systems and societies.

## 1.2. Purpose of the Communication and Dissemination Report

Activities serving the dissemination and exploitation of results are a way to showcase the work that has been done as part of the Erasmus+ project. Sharing results, lessons learned and outcomes and findings beyond the participating organisations will enable a wider community to benefit from a work that has received EU funding, as well as to promote the organisation's efforts towards the objectives of Erasmus+, which attaches fundamental importance to the link between programme and policies.

In terms of the Erasmus+ Programme this involves spreading the word about the project successes and outcomes as far as possible. Making others aware of the project outcomes will impact on other organisations in the future and will contribute to raising the profile of the organisation carrying out the project.

## 2. Dissemination strategy

The Dissemination strategy enabled clear and effective communication of the project messages and activities at local, national and EU level, engaging with target groups and relevant stakeholders in order to extend the impact of the CATALYST project. Dissemination activities were aligned with major milestones to maximize the impact of the project, in strong connection with all work packages.

The dissemination goals were:

- Raising public awareness on the CATALYST project objectives,
- Engaging different target groups with information adjusted to their needs,
- Maximising the impact of the project on stakeholders,
- Enhancing new partnerships by promoting the CATALYST interactive and open platform among universities and industry.

The dissemination activities of the CATALYST project were designed to ensure effective communication, stakeholder engagement, and long-term visibility of the project results. Key objectives included defining partner responsibilities, identifying relevant target groups and stakeholders, selecting appropriate dissemination methods and communication channels, establishing KPIs to monitor effectiveness, and ensuring coherent administration of dissemination activities.

To achieve these goals, the consortium implemented a structured and phased dissemination approach with clearly defined messages, activities, responsibilities, timelines, feedback mechanisms, and evaluation criteria. The project also leveraged the individual networks and stakeholder connections of consortium partners to maximise outreach and engagement. Throughout the project, CATALYST developed and maintained a strong communication presence through its visual identity, website, social media channels, promotional materials, events, and stakeholder outreach activities. LinkedIn and other digital communication channels played a particularly important role in ensuring visibility and engagement. Dissemination activities promoted the project's objectives, training opportunities, and results to professionals, SMEs, students, VET providers, and other relevant stakeholders. The consortium also monitored the impact of dissemination activities through KPI tracking and stakeholder feedback.

Dissemination and exploitation of the CATALYST project results will be continued after the funding period. The courses developed, as well as the CATALYST open and interactive platform, will be sustained beyond the project lifetime. Project results and deliverables will be visible on the project web portal, the CATALYST open and interactive platform, social media platforms and institutional web portals, and thus accessible to all interested parties. In this way, long-term benefits to target groups and stakeholders will be provided and dissemination and exploitation of project results will extend beyond the project duration.

## 2.1. Target Groups and Stakeholders

The CATALYST dissemination strategy focused on reaching key stakeholder groups relevant to sustainable business transformation and vocational education. Main target groups included SMEs and professionals, students, business associations, educational organisations, and public institutions. The consortium used partner networks, events, the online platform, and social media channels to engage stakeholders and promote project results. Particular emphasis was placed on involving SMEs and professional associations to ensure that training opportunities and project outputs responded to real market and skills needs.

## 2.2. Dissemination tools and channels

All 16 project partners maintained a constant flow of information to the CATALYST Coordinator and the communication team in WP7. All of their information were distributed through different

channels that are used for dissemination in the project: project web portal, web based platform, events, Social media, published materials, professional magazines, networks and associations and workshops roundtables and conferences. A comprehensive dissemination log with all implemented activities and links to all social media postings can be found in Annex.

### 2.2.1. CATALYST website

The project website is online at the following URL: <https://projectcatalyst.eu/>. The working language of the web portal is English. The project web portal serves as a tool for both dissemination and communication. Along with the mandatory public-accessible information about project's aims and activities it provides members some important additional features such as asynchronous communication by using web-based forum group mailing, file sharing and others. The web portal will remain active after the end of the project.

The web portal structure:

- A homepage which introduces the project and shows the latest news;
- A Section describing all the project partners and their role in the project, linking them with the partner's web portal;
- A section describing the project activities;
- A section intended for the publication of the public content (events, photos);
- A section intended for the project outcomes of the produced deliverables;
- A private section where partners can upload documents.

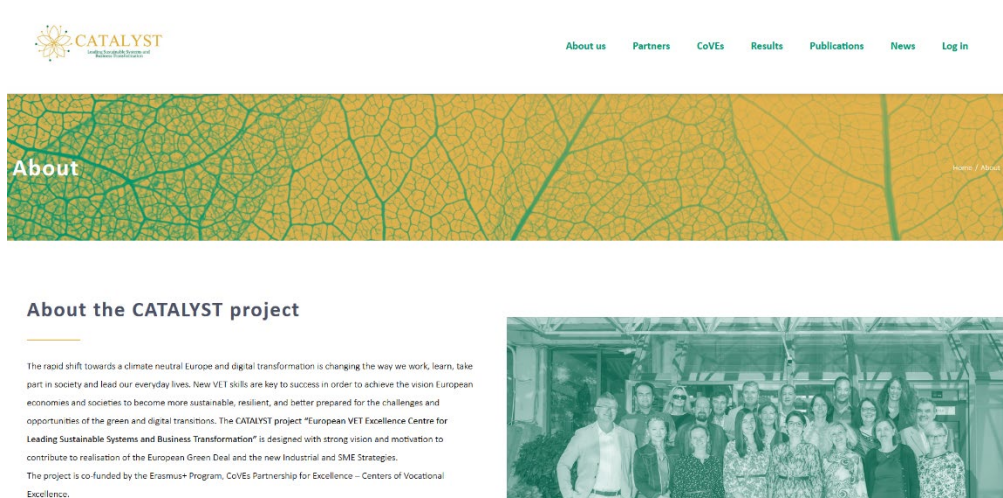

Figure 1: Screenshot of the landing page at [projectcatalyst.eu](https://projectcatalyst.eu)

### 2.2.2. CATALYST platform

The interactive learning platform, available at [catalystplatform.net](https://catalystplatform.net), is the heart of the project. Here, over 70 online courses, developed by the project partners, are accessible for businesses, students, professionals and all people who are interested in sustainability topics such as circular economy, resilient transition, or sustainable business management. After enrolling, students can browse through the courses, discover resources and services, connect with like-minded individuals or sign up to join the catalyst network. Detailed information can be found in D6.1 and D62.

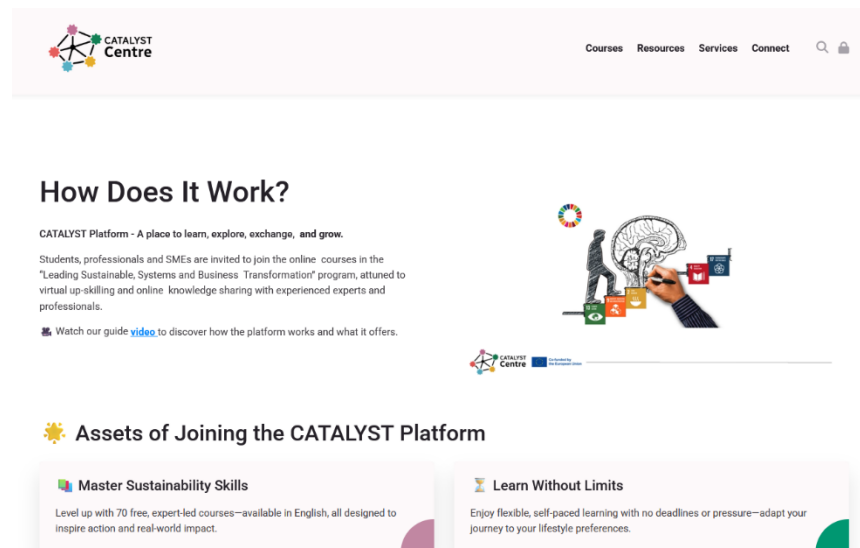

Figure 2. Screenshot from the landing page at [catalystplatform.net](https://catalystplatform.net)

### 2.2.3. Catalyst prospectus magazine

CATALYST Prospectus Magazine is a biannual open access online magazine offering practitioner perspective on the topics of sustainability and management free of charge. The goal of the magazine is support business transformation by providing helpful information, a space to share best practices, inspiration, and guidance. Each issue had the following elements:

**P:** Insights into ideas that are essential for Leading Business Sustainability and VET Excellence Centres Vocational Training

**Resources:** Practical ideas and insights from other platforms for assistance

**Opportunities:** Calls for networking activities or other internal and external possibilities

**Showcase:** Section to mention outstanding achievements

**Partnerships:** Section to introduce ourselves and other partners

**Excellence:** Section to highlight any best practices or innovations

**Community:** Section to emphasise and present community opportunities

**Transformation:** Section to show methodologies and/or how-to content

**Updates:** Events of the network both those open to the public and those for members only

**Society:** The impact of what CATALYST does on society at large, including SDGs, good practices, and community initiatives.

All 5 issues of the magazine are available on the CATALYST website at <https://projectcatalyst.eu/catalyst-prospectus/>.

Figure 3. Screenshot from the cover of the Magazine

## 2.2.4. Social media

Social media has become a very popular means of disseminating information fast across heterogeneous target groups. These channels serve on-demand access to content anytime, anywhere, on any digital device. To extend the project target audience (especially to involve the great public and not only sector experts), CATALYST integrated these media tools strategically in the communication activities.

LinkedIn, Instagram and Facebook have been selected as the most appropriate social networks to promote the project achievements, news and outcomes. The main objectives of the social media profiles were to maintain closer relationships and engage with the target audiences and disseminate knowledge; and bring the project activities closer to the target group. Members were always encouraged to repost and re-share this kind of information through their corporate or private profiles. LinkedIn became the most popular communication channel of the project, with over 1200 followers. A detailed analysis of the social media activities can be found in Annex.

Table 1: overview of the social networks for which a CATALYST profile was created

<b>FACEBOOK</b>		
	<p><b>Account:</b> <a href="https://www.facebook.com/catalyst.project.erasmus">https://www.facebook.com/catalyst.project.erasmus</a></p> <p><b>Official Hashtag:</b> @catalyst.project.erasmus</p>	<p>Facebook was focused on broadcasting all relevant CATALYST news, calls, events and partner activity in real-time if possible (a.e. live action of a CATALYST partner in external event)</p>
<b>INSTAGRAM</b>		
	<p><b>Account:</b> <a href="https://www.instagram.com/catalystcentre.eu/">https://www.instagram.com/catalystcentre.eu/</a></p> <p><b>Official Hashtag:</b> @catalystcentre.eu</p>	<p>The platform was primarily used to appear to a younger audience with compelling visuals. Links and calls to action, as well as occasional stories with “behind the scenes” footage could also be found on the account.</p>

<b>LINKEDIN</b>		
	<p><b>Account:</b> <a href="https://www.linkedin.com/company/catalyst-erasmus-project/">https://www.linkedin.com/company/catalyst-erasmus-project/</a></p> <p><b>Official Hashtag:</b> @catalyst-erasmus-project</p>	<p>The CATALYST LinkedIn Profile was used to publish the most relevant content and news of the project to reach a wider audience. LinkedIn became the most active and most important communication channel. The discussion group focused on the interaction with the CATALYST audience.</p>
<b>YOUTUBE</b>		
	<p><b>Account:</b> <a href="https://www.youtube.com/@catalystproject">https://www.youtube.com/@catalystproject</a></p> <p><b>Official Hashtag:</b> @catalystproject</p>	<p>The CATALYST Youtube channel has been used to publish short videos and impressions of the project.</p>

### 2.2.5. Events

During the project, partners identified and participated in relevant national and international events, which provided valuable opportunities to present the project, engage with target audiences, and strengthen networking and collaboration activities. Over 100 events like workshops, guest lectures, round tables, conferences, webinars or panel discussions, both online and in-person, were organised by or attended by the partners on behalf of CATALYST during the project lifetime. An overview of all dissemination activities including the events can be found in Annex.

Communication surrounding these events was primarily carried out through the project's social media channels, where partners shared photos, reposts, comments, announcements, and highlights from the activities. This approach enabled timely, interactive, and wide-reaching dissemination of project participation and outcomes, complementing the information shared via the project web portal. Project partners regularly informed the communication management team about their participation in external events and contributed relevant materials and updates for dissemination purposes.

## 3. Communication strategy

### 3.1. Visual identity

A set of promotional materials was developed during Phase 1 of the dissemination strategy to ensure a coherent and professional presentation of the project.

These materials included templates for deliverables (Word, Excel, and PowerPoint), communication and dissemination materials as part of the project dissemination toolkit, as well as posters and roller banners. The dissemination toolkit, particularly the brochure presenting the project findings and platform, was used as a key hand-out to inform stakeholders about the project and encourage active engagement. All materials featured the project logo, partner logos, and the EU visual identity and disclaimer. The materials were designed in collaboration with a graphic designer and made available to all partners for dissemination purposes. Electronic versions were uploaded to the project web portal to facilitate sharing and reuse. While some materials were publicly accessible, others (such as roll-up banners and posters) were made available in the restricted area for consortium use. A selection of templates and communication materials, including the brand book, flyer, and project fact sheet, can be found in the Annex.

### 3.2. Newsletter and News mail

#### External newsletter

The CATALYST Newsletter served as the primary external communication instrument of the project, designed to keep stakeholders, followers, and the broader public informed about the project's progress, events, and results throughout its four-year duration. Published at regular intervals and distributed through the project's social media channels and website, the newsletter addressed professionals, educators, business representatives, policymakers, and anyone interested in sustainable business transformation and vocational excellence.

Each edition was structured around the project's key activities and milestones, combining informative updates with calls to action — inviting readers to join the CATALYST Network, enrol in courses, participate in events, or follow the project's learning offer on the CATALYST Platform. The tone was engaging and accessible, aimed at audiences beyond the consortium itself, reflecting the project's commitment to broad outreach and impact.

**Welcome to the Catalyst Newsletter!**

In the course of the sustainability transformation, SMEs are increasingly confronted with growing requirements from politics and society. However, it is anything but easy to stay on top of things. So how can this rising complexity be addressed? **CATALYST** aims to answer this demand.

CATALYST is an EU-funded project that offers a wide range of **vocational education and training (VET) in the context of sustainability management**. Moreover, CATALYST will develop a European **learning platform** and establish a corresponding **network** of businesses, education and science.

The European CATALYST Centre of Vocational Excellence will offer a wide range of **online and offline courses enabling skill building** in areas such as **Sustainable Leadership, Sustainable Business Models as well as Organisational Development**.

**The CATALYST network has officially launched!**

A **community** of sustainable development professionals and students sharing fresh ideas, new knowledge and best practices for the benefit of all members. Join the CATALYST network to **connect with professionals across Europe**, learn about and share innovative sustainable transformation methods, and benefit from new opportunities. **Fill in the [form](#) to access all the member benefits for free.**

We look forward to connecting with you!

[Sign Up!](#)

---

**Mapping and Skills Forecast Report**

Mapping and Skills Forecast Report maps the dominant European and national policies, sectoral trends and best practices in North Macedonia, Germany, Austria, Portugal and Greece.

This report presents also the results of an **international field study**, conducted in the **five countries**. The main conclusion is that there is a need to upgrade technology and processes, by applying appropriate measures, which are aligned with regulations.

Best practices and recommendations for bridging the gap between the market and the universities through **reformed training and new educational opportunities** are also described in the report.

[Read the report](#)

Throughout its publication run, the CATALYST Newsletter served not only as a communication tool but as a record of the project's journey — capturing the energy of partner meetings, the ambition of the learning offer, and the growing community of professionals committed to sustainable systems and business transformation. Its reach extended well beyond the consortium, contributing to the visibility and recognition of CATALYST as a model for VET excellence at European level.

### Internal newsletter

The News Mail is a structured periodic newsletter, distributed to all project partners, designed to keep every member of the consortium — regardless of their direct involvement in a given work package — fully informed of the project's ongoing activities, milestones, decisions, and upcoming tasks. Together with the introduction of bimonthly online project meetings (from late 2023 onwards), the News Mail formed the backbone of CATALYST's internal communication and coordination system.

- Mid-2025: Implementation at Scale
- Late 2025: Evaluation, Sustainability & Closure Planning
- Early 2026: Final Phase & Conference

The News Mail kept all 16 consortium partners informed, motivated, and aligned — contributing to the timely completion of deliverables, the successful launch and piloting of the CATALYST learning offer, and the cohesion of a diverse international team working toward shared goals.

### 3.3. Internal communication

WP7 online meetings took place monthly. Partners shared their planned and implemented activities, events and updates during these meetings. Internal communication ensured that all partners provided consistent information about the project in their communication activities. The aim was that all parties have the same information and know their responsibilities and tasks. Several tools were used to provide continuous offline and online communication among project partners. Sharing documents and keeping all project partners up to date with the latest news was supported with the CATALYST web portal.

## 4. Role of each CoVE in communication and dissemination activities

All CATALYST CoVE were actively involved in WP7. All project partners were responsible for the implementation and monitoring of all dissemination activities at local and national level. CATALYST project team members were actively contributing by:

- identifying key stakeholders at their local and national level,
- maintaining communication with these stakeholders,
- identifying and informing about dissemination opportunities (e.g. events, courses, innovation action, opportunities via the CATALYST platform, publications, etc.),
- disseminating project results at relevant conferences, workshops and other events attended by the project participants,
- participating in media, enrolment and promo campaigns,
- contributing content to the project web portal, its social media channels, newsletters, press releases, etc.,
- using their web portals and online platforms to support dissemination of the project results, as well as to promote project events,
- monitoring dissemination activities, collecting relevant data and prepare reports,
- informing the coordinator and the leads of single tasks about upcoming events, relevant news, significant project results and participation in external events (for the purpose of publishing data on the project web portal and social media platforms).

The following section provides a selection of dissemination and communication highlights contributed by the CoVE throughout the implementation of CATALYST. The examples illustrate the variety of activities carried out at local, national, and international level, including social media campaigns, events, newsletters, stakeholder outreach, publications, and promotional activities. Together, these examples demonstrate the active involvement of each CoVE in increasing the visibility of the project, engaging relevant target groups, and promoting the CATALYST platform, courses, and project results across different sectors and audiences.

#### 4.1. CATALYST CoVE in North Macedonia

A webinar titled “*Managing Personal Energy Efficiency through Mindfulness*” was organised in May 2025 to promote personal sustainability and well-being practices (Figure 3). The session introduced participants to practical mindfulness techniques aimed at improving mental clarity,

Figure 4: promotion for the personal well-being workshop

emotional balance, and personal energy management. Through guided insights and exercises, the webinar highlighted the connection between self-awareness, well-being, and sustainable professional development. The webinar engaged 17 participants from diverse sectors, including academia, business, NGOs, and sustainability networks. It reached 78 reactions on the platform and 2 reposts.

In May 2025 in Skopje at the “Public room” venue, IECE brought together stakeholders from the public sector, academia, research, and industry to explore collaboration between research and

industry through technology. The event included a speech and a networking-focused session delivered by IECE, emphasizing cooperation for progress and cross-sector engagement. It gathered

60 participants from diverse backgrounds including academia, business, NGOs, and sustainability networks. The event also achieved online dissemination with 63 reactions, 2 comments, and 12 reposts on social media platforms (Figure 4).

A Presentation of the CATALYST Project took place in May 2025 at the Faculty of Economics and the Faculty of Psychology of USCM in Skopje. The event introduced the CATALYST Platform to an audience of professionals, business representatives, and students, with a particular focus on the open call for the Specialisation Programme “Personal Growth and Organisational Development.” Organised by IECE, the presentation aimed to promote opportunities for capacity building and collaboration between academia and industry. The event gathered over 120 participants from academia and business sectors and generated online engagement with 12 reactions on social media, reflecting interest in the initiative.

The “Forum on Vocational Excellence 2022” (Figure 6) was held on 22 November 2022 in San Sebastián, Spain, focusing on the latest developments in the European initiative on Centres of Vocational Excellence (CoVE). The forum brought together stakeholders from academia, business, NGOs, and sustainability-oriented networks to discuss progress and collaboration opportunities within Erasmus+ CoVE projects. Prof. Dr. Angelina Taneva-Veshoska contributed to the event by moderating an interactive session on “Managing CoVE Projects (sustainability and impact)” and participating as a speaker in the panel on “The Erasmus+ Calls for CoVEs and matchmaking,” sharing insights on project development and cooperation mechanisms. The webinar engaged over 400 participants across multiple sectors and achieved online outreach with 45 reactions, 2 comments, and 2 shares, reflecting active interest and engagement from the community.

Figure 5: photos of the event “Can technology be a bridge between research and the industry?” in May 2025 in Skopje

Figure 7: CATALYST partner IECE speaking at a panel discussion and hosting a webinar at the 2022 forum on Vocational Excellence

The national promotional event “Sustainable competencies as key for business transformation” was held on 22 February 2024 at IECE (Figure 7). The event focused on presenting the progress of the CATALYST Project, the development of the Centre for Excellence, and the opportunities it

Figure 6: promotion for the specialisation programme for personal growth and organisational development

offers for stakeholders. Particular emphasis was placed on the importance of applying practical knowledge through the implementation of the CO-IN© model.

The session brought together participants from academia, business, NGOs, and sustainability-related networks, fostering awareness and dialogue on sustainable skills for business transformation. In total, the event engaged over 20 participants and generated online dissemination with 27 reactions, 1 comment, and 3 shares.

Figure 8: the North Macedonian national promotional event in Skopje in 2024

The online event “Catalysing Circular Growth: Specialisation Programme & Business Pilot Projects” took place on 11 June 2025 as a presentation of the CATALYST Platform. The session showcased the CATALYST Project as a gateway for creating real-world sustainability impact, highlighting how education, industry, and applied research can come together to support the transformation of business models toward a circular economy. The event aimed to connect stakeholders interested in innovation and sustainability, demonstrating practical pathways for collaboration and applied learning. It brought together around 70 participants from academia, business, and NGO sectors, and generated further online engagement with 8 likes and 10 shares, reflecting growing interest in circular economy solutions and the programme’s opportunities.

The conference “Importance of skills: facing the challenges, opportunities by Erasmus+” was held on 18 February 2023 and organised by the National Agency for European Educational Programmes

Figure 9: promotion for presenting the Catalyst platform at the event related to World Environment Day and the EU green week

and Mobility. The event focused on the importance of skills development and the opportunities created through Erasmus+ initiatives, bringing together participants from academia, business, and NGO sectors.

During the conference, IECE presented experiences, goals, and recommendations related to the CATALYST Project, highlighting the project's contribution to skills development, collaboration, and innovation. The event engaged around 50 participants and achieved additional outreach through social media engagement, including 10 likes and 1 share.

CEIM also took part in the National Promo event in February 2024 (Figure 7), where attendees were informed of the progress of the CATALYST project, the establishing of the Center for

Figure 10: photos from the Erasmus+ event in February 2023

excellence and the opportunities available, as well as the importance of the applicable knowledge with the implementation of the CO-IN© model.

The event “Teaching for Green Societies: Skills and Practical Experiences” was held on 3 May 2023 and organised by the ETF – European Training Foundation Community of Innovative Educators (Figure 10). The event created a platform for exchanging ideas and practical approaches to sustainability education, with discussions focused on green skills, innovative teaching methods, and sustainable development. During the event, CEIM presented the organisation's vision for a more sustainable future, shared key highlights from the TREASURE projects, and introduced the CATALYST Project and its objectives. The programme encouraged interactive discussions and the exchange of practical experiences related to teaching sustainability and promoting green competencies. The conference brought together around 50 participants from academia, business, and NGO sectors, while the online dissemination generated 5 likes and 1 share, contributing to the visibility of the initiative and its activities.

Figure 11: introducing CATALYST at the ETF Webinar in May 2023

The online event “Skills for Sustainable Industrial Transformation” was held on 27 January 2026 within the framework of the 2026 ECOSOC Partnership Forum. The event focused on the evolving role of vocational education and training (VET) and Centres of Vocational Excellence (CoVEs) in supporting sustainable industrial transformation and preparing future-oriented skills (Figure 11).

During the session, CEIM shared practitioner insights and experiences related to the strategic importance of CoVEs and skills development in driving sustainability and innovation across industries. The discussions highlighted the need for stronger cooperation between education, industry, and policy stakeholders in order to address emerging economic and environmental challenges. The event engaged more than 100 participants from academia, business, and NGO sectors, and contributed to online outreach through social media engagement, including 6 likes and 1 share.

Figure 12: promotion for the SDG online event in January 2026

#### 4.2. CATALYST CoVE in Germany

A virtual round-table discussion titled “Challenges and Prospects in Managing Sustainable Systems and the Transformation of Businesses” (Figure 12) was held on 7 December 2022, bringing together stakeholders from academia, business, NGOs, and sustainability networks within the framework of the CATALYST Project. The event focused on the challenges and opportunities related to sustainable business transformation in line with EU policies such as the Green Deal. Through an interactive exchange, participants discussed political frameworks, barriers faced by businesses—particularly SMEs—and the growing need for practical tools, skills development, and stronger awareness of sustainability strategies. Key topics included regulatory complexity, limited resources, and the gap between policy and implementation. The roundtable engaged 11 participants and generated valuable insights that contributed directly to the CATALYST Project

by supporting the development of targeted training approaches, learning formats, and knowledge-transfer tools tailored to real business needs.

A newsletter and website article “The Power of Coming Together!: Storytelling for Impact: The Case of Our CATALYST Project” was published on 20 June 2023 in the quarterly CSCP Newsletter 02/2023 and on the CSCP website (Figure 13). The publication highlighted the use of storytelling within the CATALYST Project as an effective approach for communicating complex sustainability topics and strengthening stakeholder engagement.

The article presented a storytelling workshop series facilitated by CSCP, where project partners collaboratively developed a shared narrative through creative methods and digital tools. It emphasised how storytelling can support alignment among partners, build trust, and transform project goals into engaging and actionable messages that enhance the impact of sustainable and digital transformation initiatives. The publication reached a broad audience of SMEs, professionals, NGOs, associations, and sustainability stakeholders through the CSCP website and newsletter, which reaches approximately 960 recipients. It also contributed to knowledge transfer beyond the consortium by presenting a replicable approach that other organisations can apply in their own sustainability initiatives.

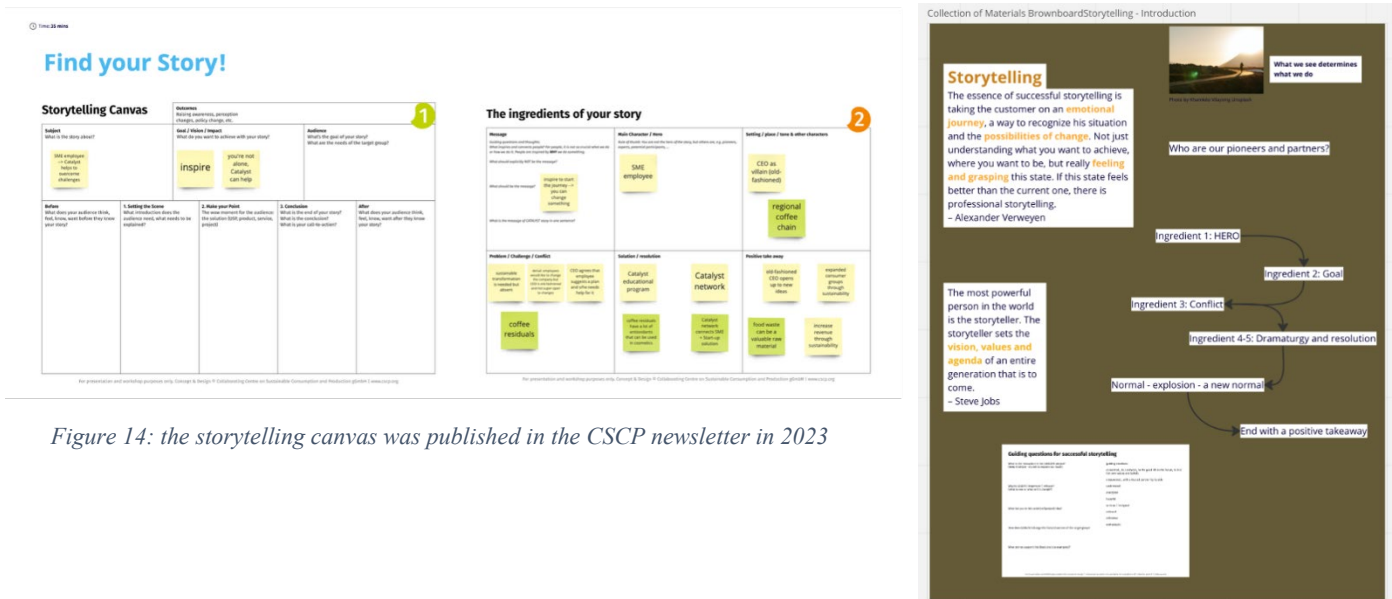

Figure 14: the storytelling canvas was published in the CSCP newsletter in 2023

The national networking event “Sustainability Competencies as Key to Transformation (Nachhaltigkeitskompetenzen als Schlüssel für die Transformation)” took place on 6 February 2024 in Berlin in a hybrid format. The event was jointly organised by the German CATALYST partners CSCP, BELLS, and FASB, and brought together stakeholders from business, education, and sustainability initiatives to explore how sustainability competencies can be strengthened within organisations. The programme included an impulse keynote by Dr. Katharina Reuter (FASB), a presentation of the CATALYST Project by Victoria Funk (CSCP), a panel discussion with practitioners from companies, and interactive networking sessions. Discussions focused on the interconnection of knowledge, skills, and mindset, highlighting the importance of intrinsic motivation, organisational culture, and practical learning formats for enabling sustainable transformation (Figure 14).

The event engaged around 70 participants from companies, training providers, and sustainability initiatives, fostering cross-sector exchange and collaboration. Key outcomes included increased awareness of the role of sustainability skills, identification of practical capacity-building approaches such as peer learning and blended learning, and strengthened connections between businesses and education providers, directly contributing to the further development of the CATALYST Project.

Figure 15: impressions from the German CoVe networking event in Berlin (2024)

The launch event “Your CATALYST to Sustainable Transformation: Building Future Competences” (Figure 15) took place on 6 November 2024 in Wuppertal in a hybrid format, as part of the 6th consortium project meeting. The event was jointly organised by all German CATALYST partners and marked the official international launch of the CATALYST educational platform.

The event introduced participants to the platform’s interactive learning environment and pilot services, which aim to address the growing skills gap in sustainability transformation, particularly among SMEs. The programme included a keynote by Dr. Phoebe Koundouri, hands-on exploration of training formats, and networking sessions connecting stakeholders from business, academia, and education.

The launch engaged over 80 participants from across Europe, both on-site and online, including SMEs, students, professionals, and academic representatives. Key outcomes included the successful international launch of the platform, increased awareness of upskilling needs for the green and digital transition, active stakeholder engagement through interactive sessions, and the initiation of collaborations and pilot participation. The event significantly strengthened the visibility of the CATALYST platform and expanded its European stakeholder community.

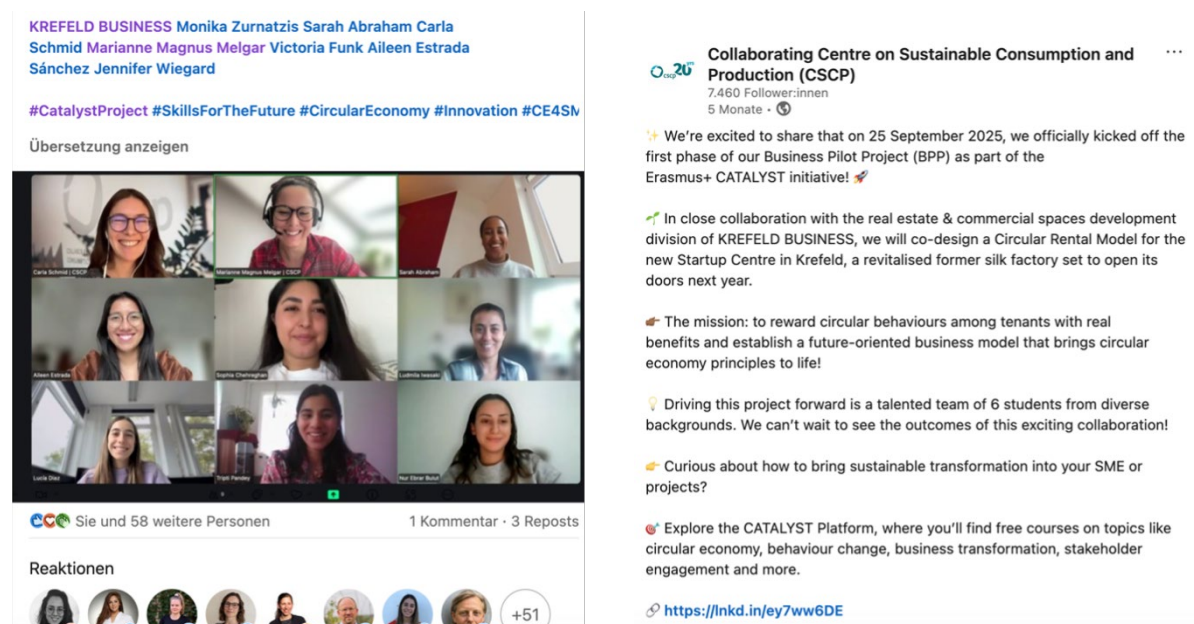

Figure 16: the international platform launch event in November 2024 took place in Wuppertal, Germany

In a LinkedIn post published on 10 October 2025, CSCP announced the launch of the first phase of the CATALYST Business Pilot Project (BPP), implemented in collaboration with KREFELD BUSINESS. The pilot focused on the co-design of a circular rental model for a new startup centre in Krefeld, aiming to encourage circular practices among future tenants.

The initiative involved an interdisciplinary student team and demonstrated how collaboration between academia, business, and innovation stakeholders can support the development of practical sustainable solutions. The post also highlighted the CATALYST platform as a resource for SMEs interested in adopting circular and sustainable business models.

The post generated active engagement with 58 likes, 3 reposts, and 1 comment. It contributed to increasing visibility of pilot activities and promoting real-world applications of circular economy principles.

🎉 We're excited to share that on 25 September 2025, we officially kicked off the first phase of our Business Pilot Project (BPP) as part of the Erasmus+ CATALYST initiative! 🌱

🌱 In close collaboration with the real estate & commercial spaces development division of KREFELD BUSINESS, we will co-design a Circular Rental Model for the new Startup Centre in Krefeld, a revitalised former silk factory set to open its doors next year.

👉 The mission: to reward circular behaviours among tenants with real benefits and establish a future-oriented business model that brings circular economy principles to life!

💡 Driving this project forward is a talented team of 6 students from diverse backgrounds. We can't wait to see the outcomes of this exciting collaboration!

👉 Curious about how to bring sustainable transformation into your SME or projects?

🌐 Explore the CATALYST Platform, where you'll find free courses on topics like circular economy, behaviour change, business transformation, stakeholder engagement and more.

Figure 17: LinkedIn promotion for the Kick-off of the Business Pilot Project by CSCP

In addition to publishing the CATALYST Prospectus Magazine, BELLS organised several “Ask an Expert” sessions in relation to the courses they published on the interactive learning platform.

The online event “Ask an Expert: Sustaining the Unsustainable? Natural Resource Governance in Nepal’s Fragile Chure Landscape” (Figure 17) took place on 25 August 2025. The session featured Dr. Binod Bhatta, an environmental governance expert who led the development of Nepal’s 20-year Master Plan for the Conservation and Management of the Chure Region, a key initiative addressing one of the country’s most ecologically fragile yet economically significant landscapes.

The discussion focused on balancing resource management, ecological preservation, and local livelihoods through integrated policy and practice approaches. Participants explored how technical education and skills development can support long-term environmental goals, as well as how multi-stakeholder collaboration can enable systemic change in sustainable land use. The event provided an interactive space for dialogue and knowledge exchange, bringing together participants interested in conservation, sustainable development, and resilient futures for vulnerable regions.

Figure 18: LinkedIn promotion for the “Ask an Expert” session, posted on the CATALYST LinkedIn profile

Another online event “Ask an Expert: Communicating our Values with Integrity for Sustainable Progress and Development” took place on 23 April 2025. The session focused on the importance of embedding a culture of integrity within organisations and adapting competences to navigate a rapidly changing “VUCA” environment.

The discussion highlighted the need for continuous learning, reskilling, and peer collaboration, as well as the value of sharing best practices and learning from challenges. It also addressed the

importance of clear and context-aware communication in today’s digital landscape, including the influence of AI and the attention economy on media and messaging.

Overall, the event emphasised the role of ethical storytelling and purposeful content creation in communicating values, fostering engagement, and amplifying meaningful impact across organisations and stakeholders.

The LinkedIn post “Learning and applying sustainability: With 30 courses on the CATALYST platform, SMEs can shape their future” was published on 17 December 2024. It promoted the CATALYST online learning platform and its range of courses designed to support SMEs in their sustainable transformation. The post highlighted key features of the platform, including flexible learning formats, tailored course content, and networking opportunities, emphasising its role in strengthening sustainability competences and supporting future-oriented business development.

The post reached a professional LinkedIn audience of SMEs, sustainability practitioners, and innovation stakeholders, generating 39 likes, 3 reposts, and 3 comments, contributing to the visibility and uptake of the platform’s learning resources.

**Nachhaltigkeit lernen und anwenden: Mit 30 Kursen auf der Catalyst-Plattform können KMUs ihre Zukunft gestalten. ⚡ Starte deine Weiterbildung jetzt!**

Im Rahmen unseres BBNE Projekts **CATALYST Project** haben wir es uns zur Aufgabe gemacht, kleine und mittlere Unternehmen (**#KMU**) auf dem Weg zur nachhaltigen Modernisierung zu unterstützen. Dafür wurden Schulungen und Weiterbildungsangebote entwickelt, die sich an Mitarbeitende, Führungskräfte und Nachhaltigkeitsinteressierte richten und dabei Grundlagen sowie Fachwissen im Bereich Nachhaltigkeit vermitteln.

Das BNW-Verbundprojekt, welches in Zusammenarbeit mit dem **Collaborating Centre on Sustainable Consumption and Production (CSCP)** und **Bells Solutions (Rhonda L. Bowen)** in Wuppertal umgesetzt wird, stellt eine Online-**#Lernplattform** mit 30 Kursen zu Themen wie Klimaschutz, Ressourceneffizienz oder agilen Methoden für Nachhaltigkeit mit praxisnahen Inhalten zur Verfügung. Ziel ist es, Unternehmen innovativ zu stärken, um eine zukunftsfähige Wirtschaft mitzugestalten. **#WERTschaften**

Anfang November startete die Plattform mit einem Launch-Event in Wuppertal, bei der auch unsere Projektmanagerin **Marla Schulz** vor Ort war und mitwirkte. Die Plattform überzeugt mit folgendem Angebot:

- Individuelles Lernen:** Kurse, wie zu nachhaltigem Eventmanagement, grünem Marketing oder sozialem Unternehmertum können im eigenen Tempo absolviert werden.
- Maßgeschneiderte Inhalte:** Spezialisierungskurse bieten die Möglichkeit zur Vertiefung in Bereichen wie Human Resources, Nachhaltige Unternehmensführung, Kreislaufwirtschaft und Nachhaltiger Finanzierung.
- Starkes Netzwerk:** Unabhängig vom Entwicklungsstadium, von der beruflichen Ausrichtung, vom öffentlichen oder privaten Sektor möchte Catalyst Unternehmen und Einzelpersonen, die vor ähnlichen Herausforderungen stehen, miteinander vernetzen. Dazu bietet die Catalyst Community einen europäischen Austausch.

**#WirtschaftVerändertWelt** Nutzt jetzt auch du deinen Hebel im Unternehmen und lerne dazu. 📖 Erfahre mehr über die Plattform und die Kurse hier: [https://lnkd.in/die\\_PW7m](https://lnkd.in/die_PW7m)

Das **#Catalyst** Programm bietet verschiedene Kurse wie zum Beispiel zur Nachhaltiger Unternehmensführung, Kreislaufwirtschaft, persönlicher Weiterentwicklung oder Marketing 📌 In welchem Bereich möchtest du dich weiterbilden?

Figure 19: LinkedIn post by FASB commemorating the platform launch event in Wuppertal

The social media posts published on 23 February 2026 on LinkedIn and Instagram were shared by Eckert Schulen, a vocational training franchise and member of FASB (Figure 19). The posts presented the CATALYST platform and highlighted the range of learning opportunities available to students and professionals. A particular focus was placed on FASB courses, including “SustainAgility” and “Introduction to Sustainable Business Transformation,” showcasing their relevance for developing sustainability competencies and supporting future-oriented education and training pathways.

The posts reached a broad professional audience through Eckert Schulen’s network and generated 19 reactions, 2 comments, and 1 repost on LinkedIn. With nearly 10,000 followers, the content achieved a significantly wider organic reach, contributing to increased visibility of CATALYST-related learning offers.

Figure 20: LinkedIn (top) and Instagram (bottom) postings by FASB member Eckert-Schulen

The networking event “How does sustainability emerge? Through connection, exchange, and shared learning!” took place on 19 November 2025 in Berlin as part of a study visit by a delegation from Azerbaijan focused on sustainable development and green event management. The exchange was later documented through a LinkedIn post highlighting the activities and key outcomes of the visit. During the visit, FASB presented the CATALYST Project, showcasing its digital learning approaches and tools for developing sustainability competencies and supporting business transformation. The session contributed to international dialogue and knowledge exchange aligned with the goals of Agenda 2030, while fostering practical insights and collaboration among participants.

The event brought together 25 participants and generated online engagement through 12 reactions, 2 comments, and 2 reposts on LinkedIn. It also sparked strong interest among attendees in the CATALYST platform and its learning opportunities.

Wie entsteht Nachhaltigkeit? Durch Begegnung, Austausch und gemeinsames Lernen!

Vom 16.–20. November 2025 hatten wir die große Freude, eine engagierte Delegation aus Aserbaidschan in Berlin willkommen zu heißen – für eine Studienfahrt, die ganz im Zeichen von nachhaltiger Entwicklung und nachhaltigem Veranstaltungsmanagement stand.

Vier Tage voller Eindrücke, Gespräche und Inspiration:

Wir reisten gemeinsam durch die Geschichte Berlins bei der „Zeitreise durch Berlin“, entdeckten auf der Domäne Dahlem, wie ökologische Landwirtschaft und Bildung Hand in Hand gehen, und erlebten in den Atelier Gardens, wie kreative Orte Wandel gestalten.

Bei **AXICA Eventlocation** am Brandenburger Tor lernten wir, wie Exklusivität und Nachhaltigkeit zusammenpassen. Das **Bundesverband Nachhaltige Wirtschaft (BNW)**-Projekt CATALYST zeigte uns innovative Wege für virtuelle Weiterbildung und Wissensaustausch. Und mit **wirBERLIN gGmbH** diskutierten wir, wie nachhaltige Events konkret umgesetzt werden können – von Abfallvermeidung bis bewusster Konsum.

Auch die kleinen Dinge machten den Unterschied:

- ✓ Alle Wege mit dem öffentlichen Nahverkehr
- ✓ Unterkunft im Hotel Morgenland mit gelebtem Integrationskonzept
- ✓ Vegane und vegetarische Mahlzeiten als Beitrag zu nachhaltiger Verpflegung

Was bleibt? Offene Gespräche, neue Perspektiven und das Gefühl, dass Nachhaltigkeit vom Miteinander lebt.

Wir haben gelernt: Wenn Menschen aus unterschiedlichen Kulturen zusammenkommen, entsteht ein Dialog, der nicht vergleicht, sondern verbindet – und den Blick auf gemeinsame Ziele wie die Agenda 2030 schärft.

Die Studienfahrt wurde von uns als **Internationales Bildungs- und Begegnungswerk (IBB) gGmbH** konzipiert und begleitet. Sie ist Teil des Projekts „Stärkung der Bürgerbeteiligung in Aserbaidschan“ (SPA) durchgeführt, das von der **Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)** mit Kofinanzierung durch die Europäische Union (EU) und das **Bundesministerium für wirtschaftliche Zusammenarbeit und Entwicklung (BMZ)** umgesetzt wird.

Danke an alle, die diese Erfahrungen möglich gemacht haben!

**#Nachhaltigkeit #SustainableEvents #Agenda2030 #InternationaleZusammenarbeit**

Nachhaltigkeit lebt vom Austausch – besonders, wenn Perspektiven aus unterschiedlichen Kontexten zusammenkommen. So toll, dass wir CATALYST Project vorstellen konnten!

Unterstütze ich • 3 Antworten

The CATALYST Project intersected with the activities of the “Netzwerk Grüne Arbeitswelt” (Green Jobs Network) across several occasions between 2024 and 2025, including networking events and multiple blog publications on the network’s website. These joint touchpoints highlighted shared priorities around sustainability skills, vocational education, and workforce development for the green transition. CATALYST aligned closely with the network’s work on future-oriented skills for sustainable business, complementing its focus on integrating sustainability into vocational orientation and professional training. The project was also actively represented at related events, where its training approach and materials (including flyers) were presented to participants, strengthening visibility and fostering dialogue with relevant stakeholders.

Across the collaboration, more than one blog entry was published and the cooperation was featured repeatedly on the network’s platform, with individual articles reaching several hundred readers. In addition, a 2024 conference brought together around 90 participants interested in green vocational guidance and networking. Overall, the collaboration strengthened knowledge exchange, increased project visibility, and supported engagement with key actors in the field of green vocational education.

the European Union

The CATALYST Project was featured in several newsletters published by FASB and key external stakeholders during 2025, including communications from the SME association BVMW. These newsletters presented the CATALYST platform as a practical resource for businesses, particularly SMEs, offering free training opportunities and tools to support sustainable transformation. Across multiple features, the project was highlighted for its relevance in strengthening sustainability competencies and supporting skills development for future-oriented business practices. The coverage helped reinforce CATALYST's position as a valuable learning and capacity-building platform.

The newsletters reached several thousand readers in total, significantly increasing the project's visibility, encouraging course participation, and promoting engagement with its training and learning opportunities across the SME and sustainability ecosystem.

### 4.3 CATALYST CoVE in Austria

The Austrian National Dissemination Event took place on 24 January 2024 in Vienna and was organised by BEST Institut für berufsbezogene Weiterbildung und Personaltraining GmbH in cooperation with the local network and strategic partner murad&murad Bildungsnetzwerk. The event brought together stakeholders and decision-makers from the Austrian and European vocational education and training (VET) landscape.

The programme consisted of an introductory presentation of the CATALYST Project, followed by a moderated round-table discussion focused on its implementation and future development. The exchange provided a platform for dialogue on how to sustainably anchor the Austrian Centre of Vocational Excellence within the broader VET ecosystem. The event was attended by 30 participants who engaged actively in the discussions, expressed strong interest in the project, and contributed valuable input for its further development and consolidation in Austria.

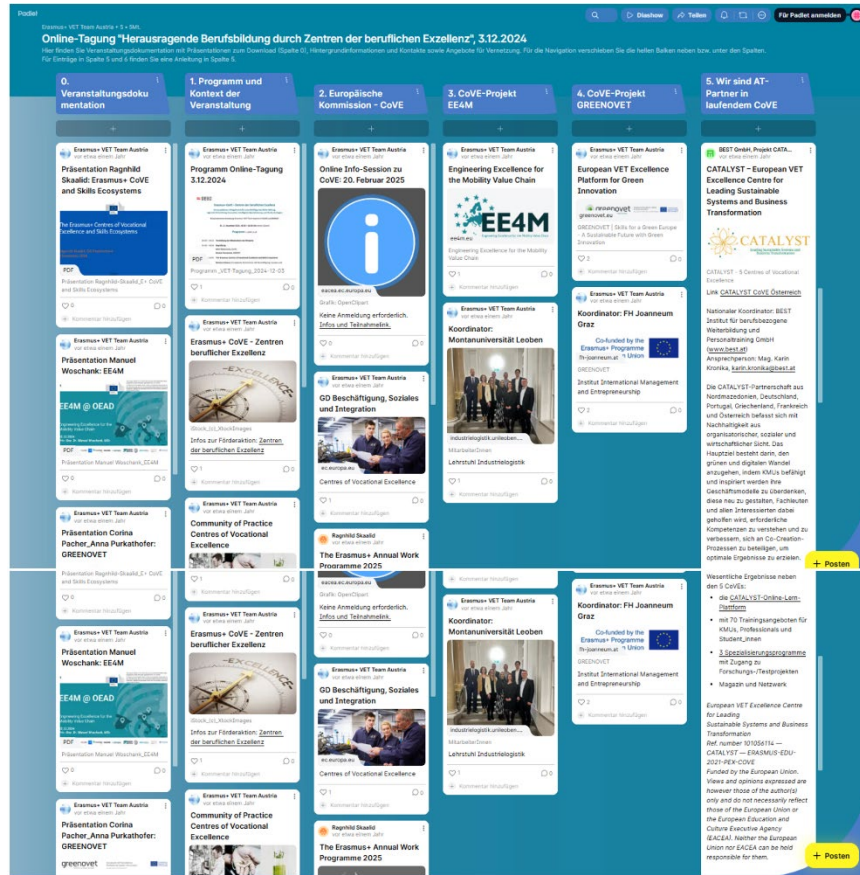

Figure 24: photos of the national roundtable in Austria in January 2024

The online conference “Herausragende Berufsbildung durch Zentren der beruflichen Exzellenz” was held on 3 December 2024 and organised by the Austrian National Agency (OeAD) as a national dissemination event focused on Centres of Vocational Excellence (CoVEs) and continuous education in the field of sustainability.

The programme included keynote input from OeAD, a plenary discussion, and interactive breakout sessions. Within this framework, BEST presented the CATALYST Project, outlining its objectives, results, and learning opportunities available on the platform, and inviting participants to register and access the online courses. The session also contributed to broader discussions on sustainability, CoVE initiatives, and networking opportunities to strengthen project follow-up and impact.

The event brought together 72 participants, primarily education providers, who showed strong interest in the CATALYST Project and provided positive feedback during and after the conference. It significantly supported the visibility and dissemination of CATALYST within the Austrian vocational education landscape.

Figure 25: the programme of the OeAD conference in December 2024

A national dissemination event took place on 18 December 2024 at the Jugendcollege (Youth College) in Vienna, Austria, and was organised by BEST as part of efforts to promote the CATALYST Project and its results among learners in Austria.

The event featured a presentation of the CATALYST Erasmus+ Project, including its objectives, key results, and the online learning platform. It also included interactive discussions on sustainability topics relevant to young people, with a particular focus on opportunities in green industries, green jobs, and skills development. The programme combined a keynote input, plenary exchange, and workshop-style group activities. Prior to the event, participants were invited to register on the CATALYST platform to explore the online course content in areas such as circular economy, sustainable business management, and leadership in transformation.

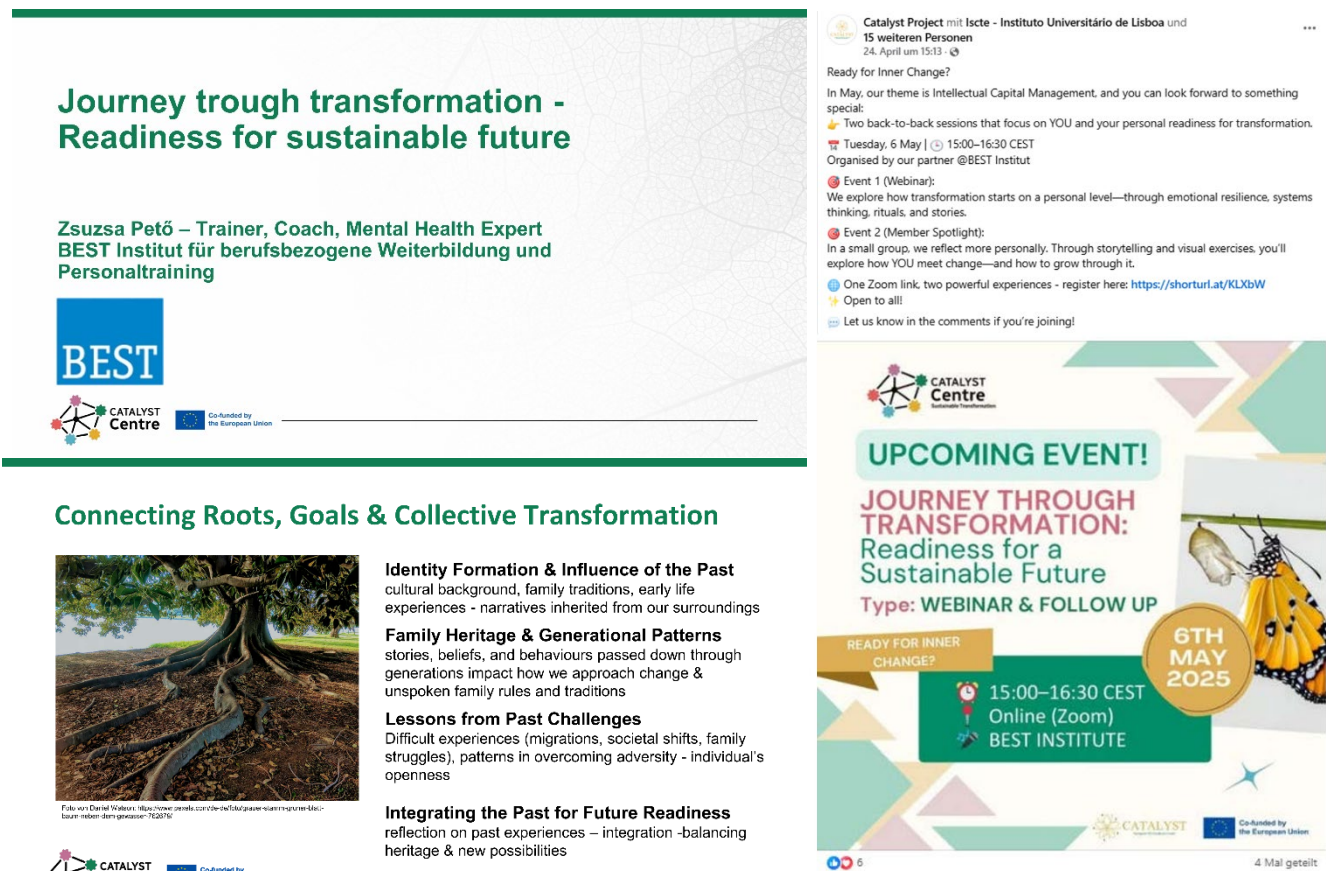

The event was attended by 31 participants, who found the sessions highly informative and engaging, particularly valuing the interactive elements and group work. Topics such as the circular economy and sustainable business practices were identified as especially relevant, and participants expressed strong interest in further exploring the CATALYST online courses and revisiting the platform for additional learning.

Figure 26: photos of the dissemination event at the youth college in December 2024

The online webinar and member spotlight “Journey through Transformation: Readiness for a Sustainable Future” took place on 6 May 2025 and was hosted on the CATALYST platform as part of the module on personal transformation readiness. The session explored transformation as a multidimensional process shaped by psychological, cultural, and systemic factors, moving beyond traditional learning approaches. Participants engaged with key themes such as self-awareness, emotional resilience, systems thinking, and the influence of traditions and narratives on both personal and collective change. The discussion also drew connections between folk stories, ecological knowledge, and psychological perspectives, encouraging deeper reflection on what it means to be ready for sustainable transformation. The session combined an introductory presentation with small-group reflective work.

The webinar was attended by 14 participants, while the member spotlight reached an additional 10 participants. Key outcomes included individual reflections and practical tools for navigating change, structured self-exploration through group discussions, and personalised insights into transformation readiness for sustainable personal and societal development.

The National Dissemination Event in Austria took place on 18 December 2025 and featured a comprehensive presentation of the CATALYST Erasmus+ Project, including its objectives, results, and a demonstration of the platform. The event also facilitated hands-on exchange on the practical implementation of the project in labour-market-oriented training contexts such as coaching, career counselling, and vocational education programmes, with a strong emphasis on cooperation with SMEs as potential employers. In addition to the project presentation, the event served as a networking opportunity for professionals engaged in adult education, VET, and youth training. Participants were required to register on the CATALYST platform to access selected online course content and explore learning opportunities in more detail.

The event was attended by 89 participants, primarily professionals from the Austrian VET and adult education sectors, including trainers, coaches, counsellors, course designers, managers, and SME representatives. It contributed to strengthening awareness, engagement, and practical uptake of the CATALYST platform within the Austrian education and training landscape.

### Eckdaten

Erasmus+ Projekt: Zentren der beruflichen Exzellenz

Projektlaufzeit: Juni 2022 – Mai 2026

16 Projektpartner

Eine der Stärken der Partnerschaft ist die Vielfalt des Konsortiums (2 Bildungsorganisationen & 1 Unternehmensorganisation pro Land sowie 1 europäisches Netzwerk), unsere unterschiedlichen Erfahrungen und Fachkenntnisse in spezifischen Themen, die viele Aspekte der Nachhaltigkeit und des Managements abdecken und einen multidisziplinären Ansatz zusammenbringen. Weiters wird das Konsortium durch 40 assoziierte Partner verstärkt.

■ Assoziierte Partner

Figure 28: photos and presentation from the National Austrian event in December 2025

In February 2026, a thematic conference provided a dedicated platform for presenting the CATALYST Project's objectives, results, and digital learning tools, while fostering exchange on digital and green transitions in adult education. The programme began with a welcome and an introduction to the project background, aims, and target groups, ensuring a shared understanding of its focus on strengthening digital and ecological competences among vulnerable adults. The core of the event was the presentation of the project results, including its structure, content, and pedagogical approach, followed by hands-on exploration of the platform. Participants also engaged in facilitated discussions on opportunities, challenges, and experiences related to supporting digital and environmental transformation in adult learning contexts.

The conference was attended by 25 experts from the field of adult education and contributed to meaningful professional exchange on innovative approaches to teaching and learning in the context of sustainability and digitalisation.

The international conference *“The Future of Business: Regenerating Nature, Society and the Economy”* took place on 29 November 2023 in Graz and featured keynote speaker Wayne Visser, a globally recognised expert on sustainable business transformation. Wayne Visser is a globally recognized “pracademic,” poet, and “possibilist” focused on the impact of business on nature and society at the conference in Graz. He holds faculty roles at the University of Cambridge and Antwerp Management School, and serves as director of Kaleidoscope Futures. Visser has authored 43 books, including the Amazon bestseller *Thriving: The Breakthrough Movement to Regenerate Nature, Society, and the Economy*. His work has taken him to 78 countries, and he has been recognized as one of the top 100 thought leaders in trustworthy business. The conference increased awareness of these offerings, encouraged stakeholder engagement, and laid the groundwork for future collaboration and uptake of CATALYST solutions.

Figure 29: Prof. Wayne Visser speaking at FH Joanneum in November 2023

The final conference of the GREENOVET CoVe project took place in Graz on 5–6 June 2024 and focused on the role of Vocational Education and Training (VET) in advancing sustainability and green innovation. The event highlighted how VET equips individuals with practical skills for emerging green industries, supports entrepreneurial thinking, and fosters a culture of sustainability beyond formal education. In an engaging online session on challenge-based learning systems, Angelina Taneva-Veshoska from the North Macedonian Institute for Research in Environment, Civil Engineering, and Energy (IECE) represented the CATALYST consortium with great professional expertise. Complementing the dialogue, Elena Dumova-Jovanoska, CATALYST's external quality expert from Ss. Cyril and Methodius University in Skopje, enriched the conference over both days with her insightful contributions. With around 250 participants attending both online and onsite, the conference provided valuable visibility for the CATALYST project and strengthened exchange with stakeholders active in green innovation and vocational excellence.

Figure 30: members of the GREENOVET CoVe project at their final conference in Graz

The webinar “Circular Economy in Life Sciences” took place on 26 May 2025 as part of a webinar series powered by LISA – Life Science Austria and hosted by Human.technology Styria GmbH. The session addressed the opportunities and challenges of reusing and refurbishing medical devices, as well as the ecological and economic benefits of repair over replacement. Johannes Oberndorfer (FH JOANNEUM, Erasmus+ project CATALYST) opened the discussion with insights from research and project management, highlighting practical approaches to circular solutions and introducing the CATALYST project. Participants gained best-practice perspectives from both users and manufacturers and engaged in dialogue and exchange.

The webinar reached approximately 45 participants and contributed to promoting the CATALYST project within the life sciences and circular economy sectors.

The *Forum on Vocational Excellence 2025* took place in Denmark on 8–9 September 2025 and brought together policymakers, educators, and industry representatives to strengthen innovation and cooperation in vocational education and training, with a strong emphasis on Centres of Vocational Excellence (CoVEs), as well as green and digital transitions. Bojan Jovanovski from FH JOANNEUM Graz participated as an expert leading the Greenovet initiative. Through active engagement in discussions and networking, he contributed to knowledge exchange and partnership-building. His presence also supported the CATALYST project by increasing its visibility and fostering new collaboration opportunities within the wider CoVE ecosystem.

**THE ROLE OF AI IN CONTEXT OF SUSTAINABILITY IN EDUCATION & COMPANIES**  
 Prof. Dr. Birgit Phillips, MA, MEd, FH JOANNEUM University of Applied Sciences

**What are some real-world examples of how AI can help us address pressing sustainability challenges?**  
 AI is already solving real sustainability problems in ways that are practical and scalable. Cities are using it to cut traffic congestion by optimizing transport systems in real time, directly reducing emissions. Farmers rely on AI to predict weather and fine-tune irrigation, growing more food while using fewer resources. Energy grids use AI to predict demand, prevent waste, and integrate renewable energy more efficiently. In construction, AI tracks biodiversity and detects illegal activities like poaching in real time. Even manufacturing is using AI-driven efficiency, with systems that monitor material waste and reduce energy use. These aren't just future promises—they're concrete examples of how AI is making a difference today.

**How can small businesses and individuals leverage AI tools to reduce their environmental impact?**  
 At office and small business and individuals some incredibly practical ways to reduce their environmental impact. For example, small businesses can use AI to optimize energy use—adjusting heating and cooling systems automatically based on real-time data, which cuts costs and carbon emissions. Delivery services can leverage AI to map the most efficient routes, saving fuel and time. Even inventory management benefits, with AI predicting demand to reduce waste from overstocking. On an individual level, AI apps can help people track their carbon footprints or suggest more sustainable choices in their daily lives. There's a host of accessible tools that don't require huge investments but can have a real, measurable impact on sustainability.

**How can universities contribute to global AI and sustainability initiatives?**  
 Universities have a unique role to play in enhancing AI and sustainability. They're not just educating future leaders; they're actively solving real-world problems. By integrating AI and sustainability into interdisciplinary programs, universities can equip students with the tools to address challenges like energy optimization or waste reduction. Companies themselves can serve as testbeds for AI-driven solutions, demonstrating what's possible with technologies like smart energy systems or water tracking. Collaboration is key—partnering with industry and governments to tackle issues like carbon reduction or biodiversity conservation creates scalable impact. And by participating in global networks, universities ensure their innovations and practices align with ethical

The article “THE ROLE OF AI IN CONTEXT OF SUSTAINABILITY IN EDUCATION & COMPANIES” by Prof. Dr. Birgit Phillips (FH JOANNEUM University of Applied Science) was published in December 2024 in the CATALYST Prospectus Magazine (2nd Edition) and contributes to the broader discourse on digital transformation and sustainability in education and industry within the CATALYST framework. Prof. Birgit Phillips shows how AI already supports sustainability in practice. It helps cities reduce traffic emissions, enables farmers to optimise irrigation, improves energy grid efficiency, and supports biodiversity monitoring. Businesses use AI to cut waste and energy use, while individuals can track and reduce their carbon footprint. However, AI also has environmental costs, such as high energy consumption, and risks like bias, requiring efficient design, renewable energy use, and regulation. Universities play a key role by combining education, research, and collaboration, while students need technical, ethical, and interdisciplinary skills to address sustainability challenges effectively

The article ultimately highlights the dual role of artificial intelligence as both an enabler and a challenge for sustainability, underlining the importance of responsible innovation, regulation, and interdisciplinary education to support long-term sustainable development.

The online “Ask an Expert” session “The Future of Sustainable Packaging” with Fabian Gems

Figure 32: LinkedIn promotion for the “Ask an Expert” session in May 2025

(SUPASO GmbH) took place on 25 May 2025 and was promoted via LinkedIn as part of the CATALYST dissemination activities. The session provided an exclusive expert talk on how businesses can innovate in sustainable logistics and packaging, with a focus on recent developments in eco-friendly solutions. Fabian Gems, CEO of SUPASO GmbH, presented high-performance insulated packaging solutions made from recycled waste paper, offering a sustainable alternative to Styrofoam. The discussion highlighted innovative packaging approaches, sustainable transformation in logistics and e-commerce, and emerging market opportunities in temperature-sensitive shipping for the food and pharmaceutical sectors.

The event was attended by 10 online participants, while the LinkedIn promotion reached 211 impressions. It contributed to raising awareness of sustainable packaging innovations and supporting knowledge exchange on business transformation toward greener supply chains.

A LinkedIn post regarding the “National Round Table” was published on 24 November 2023 and reported on the first workshop held within the CATALYST Project at FH Joanneum. The post highlighted the collaborative nature of the workshop and thanked participants for their active engagement in the discussions. Special appreciation was given to the speakers Doris Kiendl, Rupert Beinhauer, and Thomas Winkler for their insightful contributions, as well as to the supporting team and venue partners who contributed to the successful organisation of the event.

The post reached a professional audience on LinkedIn and generated 34 likes and 1 repost, reflecting positive engagement and interest in the project’s activities and exchange formats.

A guest lecture titled “Sustainability Concepts” was delivered on 23 July 2025 at Nirma University in Ahmedabad, Gujarat, India, during a business visit to the institution. The lecture introduced MBA students to key topics such as sustainability, the circular economy, and sustainable business models, with a focus on how these concepts are applied in practice. The CATALYST Project was presented as a best-practice example, including a demonstration of the platform and its learning approach, illustrating how digital tools can support sustainability education and business transformation.

The session was attended by approximately 25 MBA students and contributed to raising awareness of sustainable business practices and innovative learning resources in an international academic context.

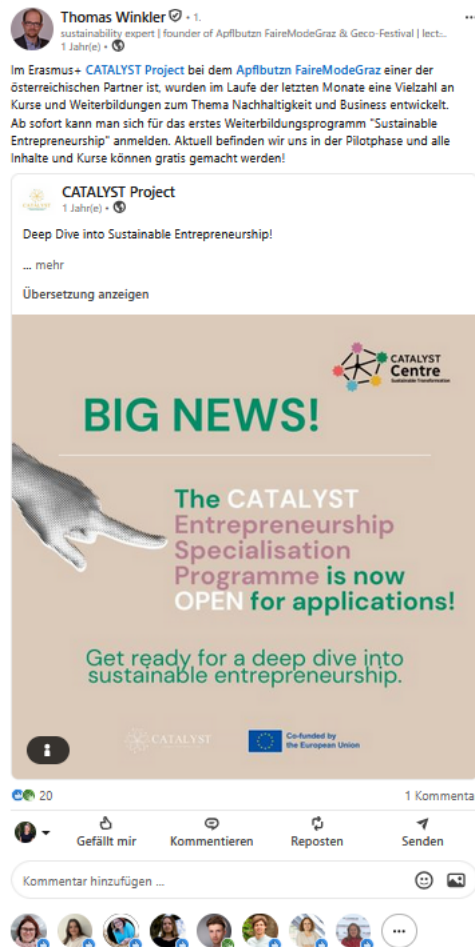

The LinkedIn post “Mapping and Skills Report” was published on 31 March 2023 and presented the results of the CATALYST Mapping and Skills Forecast Report.

The report mapped key European and national policies, sectoral trends, and best practices across North Macedonia, Germany, Austria, Portugal, and Greece, drawing on findings from an international field study conducted in these countries. It highlighted the need to upgrade technologies and processes in line with regulatory frameworks and identified strategic directions for sustainable development.

In addition, the report outlined best practices and recommendations for bridging the gap between the labour market and universities through reformed training approaches and new educational opportunities, contributing to improved alignment between education systems and industry needs.

Figure 33: LinkedIn post regarding the first results of the CATALYST project, March 2023

The LinkedIn post promoting the Green Entrepreneurship Specialisation Programme was published on 31 March 2023 and highlighted opportunities for learners to engage with sustainable entrepreneurship content within the CATALYST framework.

The post briefly presented the programme's focus on green business development and skills for sustainable entrepreneurship, aiming to raise awareness and encourage participation among relevant professional audiences.

It reached 469 impressions on LinkedIn, contributing to the visibility of the specialisation programme and its learning opportunities.

#### 4.4 CATALYST CoVe in Portugal

In February 2024, the Portuguese project partners presented the CoVe Future Skills Factory. The event, held at Iscte-IUL, presented the CoVe – Future Skills Factory, an initiative developed following the Catalyst Project, that strengthens the focus on Vocational Excellence, lifelong learning, and stronger links between education, training, and industry. Representatives from organisations such as IAPMEI, AUDAX, INA, and IPSantarém discussed how to prepare individuals for the digital and green transitions. A keynote by João Santos highlighted European perspectives on skills development and training policies. Participants exchanged views on workforce needs, policy alignment, and innovation strategies. The session concluded with

recommendations and interactive discussions, reinforcing collaboration towards sustainable and digital transformation across sectors.

Figure 34: presenting CATALYST at the CoVe Future Skills Factory in 2024

The event “Transformation for Sustainability: Anticipating the Skills of the Future” took place on 30 January 2025 at Iscte-IUL and formed part of the CoVE – Future Skills Factory initiative focused on future-oriented skills for sustainable transformation. The session presented the CATALYST platform and its functionalities, highlighting its role in supporting education and workforce development aligned with sustainability goals and labour market needs. It also introduced plans for a collaborative network connecting academia, industry, and policymakers to strengthen innovation and partnerships in skills development. Overall, the event emphasised the importance of anticipating future competencies for sustainability transitions within the European framework and supporting long-term strategies for educational and professional growth.

Figure 35: Transformation for Sustainability: Anticipating the Skills of the Future, January 2025

The webinar “Intellectual Capital Management: Measuring and Corporate Reporting” was held on 26 June 2025 online and formed part of the CATALYST dissemination activities. The session focused on the strategic importance of intellectual capital in driving organisational change and sustainability. It explored how human, organisational, relational, and knowledge capital can be effectively managed to support innovation, improve performance, and enable long-term development. Participants were introduced to key concepts, tools, and approaches for measuring and leveraging intellectual capital in both business and institutional contexts.

Overall, the webinar contributed to strengthening competencies related to green and digital transitions, highlighting the importance of intangible assets in sustainable development. It also supported the CATALYST Project by promoting its courses and reinforcing skills development for transformation-oriented leadership.

The webinar “Sustainable Business Management” took place on 17 September 2025 and was held online via Microsoft Teams as part of the CoVE – Future Skills Factory initiative. The session brought together experts and participants to explore how organisations can integrate sustainability principles into their management practices. It included an opening session, a keynote presentation by an ISCTE-IUL expert, an interactive Q&A, and concluding remarks, fostering exchange between academia and industry. Overall, the webinar aimed to raise awareness of sustainability challenges and opportunities in business management while promoting collaboration and skills development for sustainable transformation. It also contributed to the broader objectives of the CATALYST Project by supporting capacity building for green and digital transitions.

Figure 36: Screenshot and promotion for the Sustainable Business Management webinar

The 2025 Conference “Shaping the Future of Data, Knowledge and Innovation with AI for Global Sustainable Change” took place on 27–28 November 2025 at Iscte-IUL in Lisbon and was sponsored by the CoVE – Future Skills Factory (FSF), positioning it within a broader international collaboration on innovation and sustainability.

The conference brought together academics, policymakers, and industry leaders to discuss key themes such as knowledge management, artificial intelligence, sustainability, and digital transformation. The programme featured keynote speeches from internationally recognised experts, including Dr Jay Liebowitz and Dr Vânia Neto, and included roundtable discussions and interactive sessions designed to foster interdisciplinary exchange.

Overall, the event highlighted the role of CoVEs and initiatives such as FSF and CATALYST in building networks for innovation, supporting sustainable transformation, and strengthening global collaboration across research, education, and industry.

Figure 37: impressions from the GFIC conference in November 2025

The webinar “Green Jobs and Emergent Talents” took place on 21 May 2025 online via Microsoft Teams and was widely disseminated through partner channels, including the Engineering and Tooling Cluster, the GEMSTONE project, and the CoVE – Future Skills Factory network. The session focused on skills, jobs, and emerging talents in the context of the green transition, with particular attention to the manufacturing sector. It explored how organisations can respond to sustainability-driven transformation by strengthening workforce competencies and adapting training approaches to new industrial needs.

Overall, the webinar highlighted the central role of education and skills development in enabling the green transition of industry, emphasising the importance of aligning training systems with evolving labour market demands and sustainability challenges.

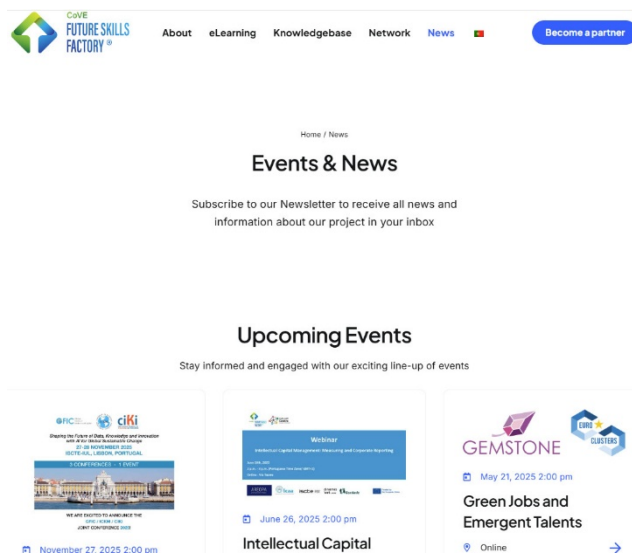

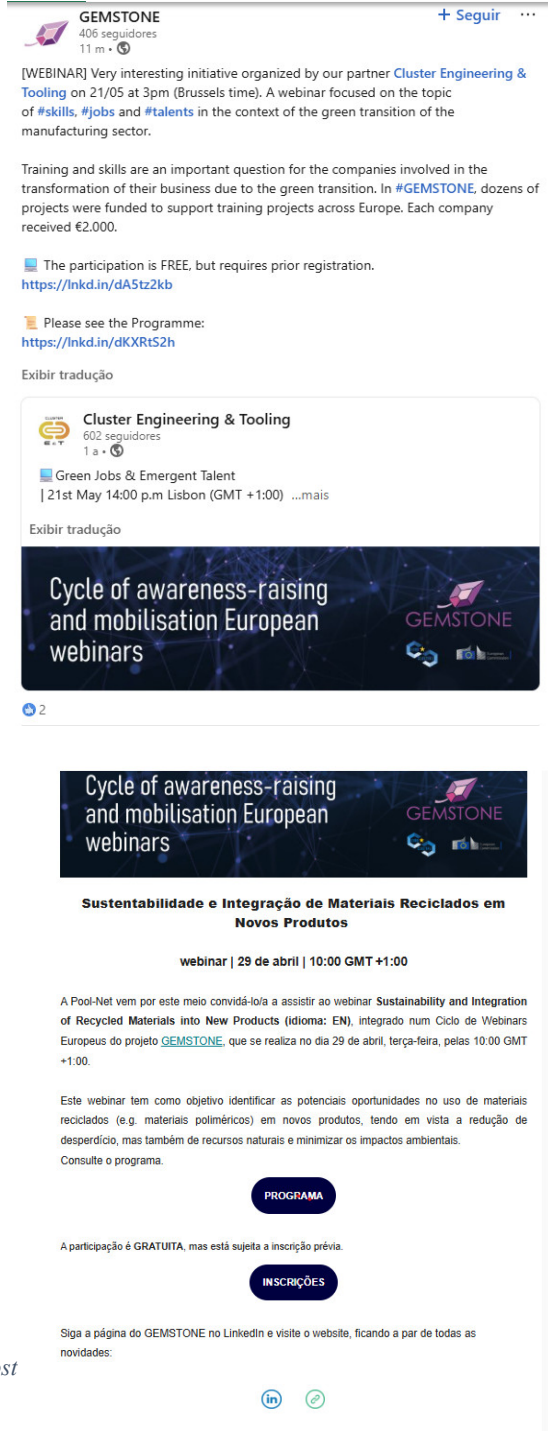

Figure 38: Website announcement, E-mail marketing and LinkedIn post regarding the webinar “Green Jobs and Emergent Talent”

#### 4.5 CATALYST CoVE in Greece

The CATALYST project has been presented in various online articles, blog posts and news items, drafted by the AUEB team. The articles targeted various audiences, some addressing specifically training/education experts, some others disseminating the work of the project to wider audiences.

Figure 39: the AUEB team at various events where CATALYST was presented.

## 4.6 Additional international reach

The event “Skills for Sustainable Industrial Transformation: Lessons from Multi-Stakeholder Partnerships for SDGs 9 and 11” took place on 27 January 2026 as an online ECOSOC Partnership Forum side event, with additional dissemination through a YouTube recording and an official summary published on the UN SDGs website (sdgs.un.org). This side-event to the ECOSOC Partnership Forum brought together international organisations, governments, and education actors to discuss how skills development can support sustainable industrial transformation and accelerate progress on the SDGs. Organised by the University College Dublin, Sustainable Development Solutions Network (SDSN), and UNITAR, the event highlighted the growing gap between education systems and labour market needs, especially in the context of green and digital transitions. It showcased initiatives such as CATALYST project and BuildSkills Academy as practical examples, and emphasized the importance of stronger TVET systems, transversal skills, and international collaboration.

The event was attended by 65 participants, with additional dissemination through the SDSN YouTube channel (31.3k subscribers) and the official UN SDGs webpage summary, further extending its visibility and impact.

Figure 40: Youtube video and promotional article for the SDG webinar in January 2026

**ECOSOC Partnership Forum**

**Building Our Future Together**

2026 ECOSOC Partnership Forum Side Event

**SKILLS FOR SUSTAINABLE INDUSTRIAL TRANSFORMATION:  
Lessons from Multi-Stakeholder Partnerships for SDGs 9 and 11**

27 January 2026, 8:00 - 9:30 ET, Zoom

Organized by: [University College Dublin \(UCD\)](#), [Government of Ireland SDG Champion](#), [UN Sustainable Development Solutions Network \(SDSN Association\)](#), [UNITAR](#), [UAE Ministry of Cabinet Affairs: The General Secretariat of the UAE National Committee on SDGs](#)

**Background on the event**

This side-event explored how coordinated, equitable and innovative partnerships for skills development can accelerate sustainable industrial transformation and support the 2030 Agenda. Drawing on the SDG Academy's global series on skills for sustainable development, the event brought together speakers engaged in international policy processes and global lifelong learning networks to highlight how countries are shaping future-ready skills ecosystems. It also presented two EU initiatives—[BuildSkills Academy](#) and [CATALYST](#)—as practical models for updating training systems and widening access to green and digital skills.

### Key Issues discussed

- **Sustainable industrial transformation is increasingly constrained by the skills systems that are not keeping pace with green and digital transitions**, leading to widening skills gaps that constrain innovation and risk excluding workers and SMEs from emerging economic opportunities.
- **There is a broken link between TVET systems and labour market needs**. TVET learners still lack foundational skills and face many financial barriers to complete their studies. In parallel, TVET teachers lack training and motivation to support students, while TVET providers face limited accountability. All of these challenges continue to limit employment outcomes, productivity and sustainable development.
- **Skills strategies for sustainable industrial transformation remain overly focused on technical competencies**, while critical transversal and leadership skills are often overlooked. Soft skills such as systems thinking, collaboration and adaptive decision-making are essential for navigating AI-

The blog post “Skills for Sustainable Industrial Transformation: SDSN at UN ECOSOC Partnership Forum 2026” was published on 10 February 2026 on the SDG Academy website and served as a follow-up dissemination activity to the ECOSOC side-event on sustainable industrial transformation and skills development. This blog post, published on the SDG Academy website, summarizes key discussions and insights from the ECOSOC side-event on skills for sustainable industrial transformation. It outlines the main challenges related to skills gaps, education systems, and workforce readiness, and highlights the role of partnerships and lifelong learning in addressing them. The blog also presents CATALYST as a concrete example of how training and capacity-building can support sustainable development and help align skills systems with the needs of a changing economy. The publication contributed to the wider dissemination of the event outcomes and reached a broad international audience through the SDG Academy website, which attracts approximately 100,000 unique visitors annually.

CATALYST

The CATALYST project was presented as a concrete example of how CoVEs can support sustainable transformation by addressing skills needs across systems, organisations and individuals. Built on the Collaborative-Innovative (CO-INE) Model, CATALYST applies a holistic university-industry collaboration approach to address complex, interconnected sustainability challenges by bringing together education providers, businesses and policymakers. Through its Centre of Vocational Excellence for Leading Sustainable Systems and Business Transformation, the initiative supports personal and organisational development, helps SMEs integrate sustainability into their business models, and contributes to policy dialogue.

Through the CATALYST Platform, the project offers 70 free online courses, specialisation programmes and resources across three complementary levels: Leading Sustainable Systems (systemic), Creating Sustainable Brands (organisational) and Embracing Sustainable Growth (personal and interpersonal). This learning offer is complemented by Business Pilot Projects that connect companies, students and educators in real-world applications, as well as by the CATALYST Network. Together, these elements illustrate how CoVEs can function as multi-level skills ecosystems, linking lifelong learning with innovation and sustainable business transformation.

More information is available on the slides below.

Accelerating SDG Progress through Empowering Professionals and Transforming Businesses

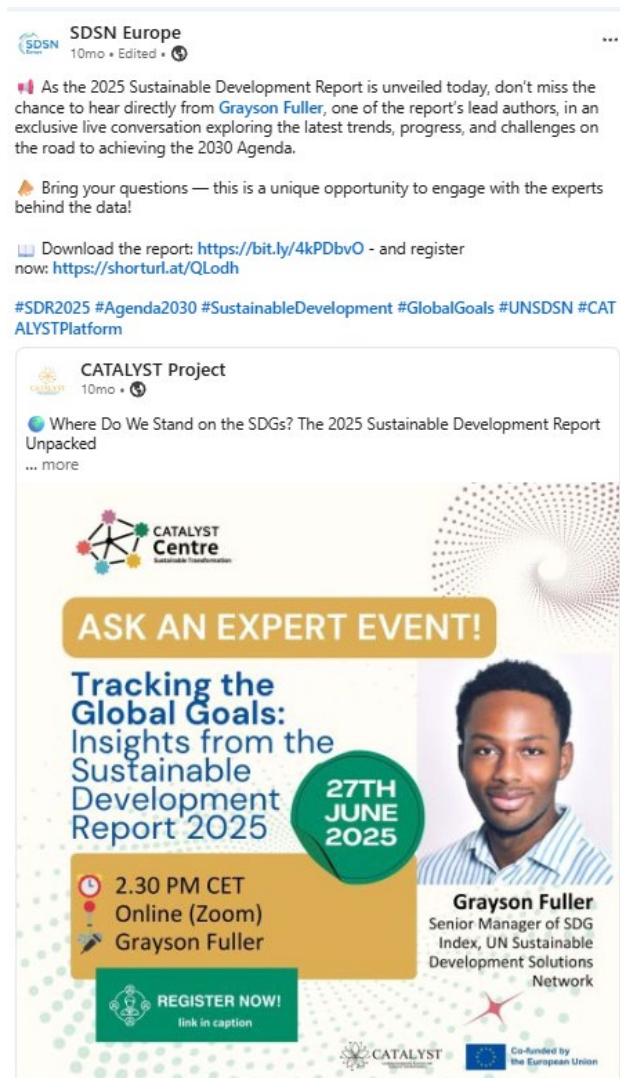

Climatic and social challenges that the world faces today need to be addressed with new patterns, technologies, policies, and ways of thinking. This is essential to the accomplishment of the United Nations Agenda 2030 and its Sustainable Development Goals (SDGs). Although there has been some progress since the implementation of the Agenda in 2015, the SDG ambition has not been met, especially after the COVID-19 pandemic, revealing that more, more than ever, sustainability upskilling is crucial. The SDGs are still such and Europe is not an exception.

Activar Windows Accede a un parametro para activar Wind

Sustainable Development Goals (SDGs). This blogpost presents the CATALYST project in the broader context of stalled progress on the Sustainable Development Goals (SDGs). It highlights the urgent need for sustainability upskilling and transformative action across sectors, particularly in Europe. The blog explains how CATALYST contributes to accelerating SDG progress by supporting Vocational Education and Training (VET) and helping professionals and small and

medium-sized enterprises integrate sustainable practices. It targets a wide audience, including policymakers, educators, businesses, and sustainability practitioners engaged with SDSN networks. The publication contributed to increasing international visibility of the CATALYST Project and reached a broad audience through the SDSN Global platform, which receives approximately 324,000 unique visitors annually.

The LinkedIn posts promoting the “Ask An Expert” event “Tracking the Global Goals: Insights from the Sustainable Development Report 2025” were published on 24 and 27 June 2025 through the SDSN Europe network. The posts promoted an exclusive live conversation with one of the lead authors of the Sustainable Development Report 2025, focusing on the latest trends, progress, and challenges related to achieving the 2030 Agenda and the Sustainable Development Goals. The campaign aimed to raise awareness of global sustainability developments and encourage participation in expert dialogue on SDG implementation and policy progress. The dissemination activities reached a broad professional audience through the SDSN Europe LinkedIn page, which has nearly 5,000 followers, contributing to the visibility of the event and engagement with sustainability-focused stakeholders.

We have just under four years left to achieve the #SustainableDevelopmentGoals

While progress has been made, we are not on track to deliver on the #2030Agenda

Let's get back on track.

Developed as part of the **CATALYST Project**, our course, “*Implementing the Sustainable Development Goals: Challenges and Enablers*” offers an in-depth exploration of the key challenges and enablers of SDG implementation. Participants examine SDG interconnections and trade-offs, policy coherence, partnerships, financing gaps, and progress monitoring through videos, readings, and practical assignments.

For professionals, educators, and students alike—anyone who wants to learn how to make a difference.

## 5 Evaluation and monitoring of dissemination activities and effectiveness

Monitoring and evaluation of the dissemination activities were of essential importance for tracking the effectiveness of reaching the target audience, as well as for assessing the impact of dissemination activities throughout the project. Dissemination, communication, and engagement activities were monitored periodically in order to evaluate whether the defined targets had been achieved and, where necessary, to revise and improve the dissemination approach. A set of observable results and key performance indicators (KPIs) was developed for each activity planned within the CATALYST project. The communication materials developed within the project included a dedicated set of dissemination resources such as the project fact sheet, flyers presenting key achievements including the CATALYST platform and the results of the ABC survey in WP1, as well as templates for PowerPoint presentations and Word deliverables. Additional visual identity materials, including banners, posters, and the project logo, were also created and used consistently across dissemination activities.

The project further organised national and international events, including workshops, conferences, webinars, networking events, and the final international conference. Observable results included presentations delivered during the events, participant lists, and feedback collected from attendees, all of which supported the evaluation of outreach and stakeholder engagement. Online dissemination activities included the project web portal, the interactive and open CATALYST platform, and the project's social media presence. For these activities, web analytics and social media reports were used to monitor engagement and dissemination reach. Registrations and attendance figures for events and conferences were also systematically monitored and included in dissemination reporting.

In order to monitor the progress of communication and dissemination activities, dissemination log was used. It served as a tool designed as an Excel sheet, where all partners kept track of their inputs and results. For example, when a partner was responsible for organising an event, preparing presentations or press releases, or producing content for the web portal or social media, the respective action was entered into the log, including information such as date, specific channel used, location, and a brief description.

The lead partners of WP7 checked the log every six months and updated the progress of the specific KPIs in order to closely monitor dissemination efforts and, where necessary, propose contingency actions. Email reminders were sent to all partners to ensure that the log was completed before each six-month reporting period.

Throughout the project lifetime, the CATALYST consortium continuously monitored the established KPIs in order to evaluate dissemination achievements and generate recommendations for future improvements. All relevant dissemination documents and templates were shared and managed through the WP7 Google Drive repository. The complete Log with all events, workshops, conferences and online entries can be found in the Annex.

*Table 2: the KPIs that were monitored during the CATALYST project lifetime*

<b>Communication channel/tool</b>	<b>How to measure</b>	<b>Objective</b>	<b>Results</b>
<b>CATALYST web site</b>	Number of visits	3000	75.667
	Number of documents available	25	50+
	Number of documents' downloads	500	8.000
	Number of web portal updates	30	92
<b>Brochure/ leaflet</b>	Number of distributed leaflets and brochures	1200	1.500+
	Number of promo material's downloads	350	
<b>Social media channels</b>	Number of followers	300	LinkedIn: 1240
			Facebook: 312
Instagram: 16			
Youtube: 28			
	Number of posts/tweets	50	495+ across platforms and partner accounts
<b>CATALYST platform</b>	Number of visits	1500	30.000
	Number of registered users	200	798

<b>CATALYST Journal – Prospectus Magazine</b>	Number of issues published	3	4
<b>Project newsletter</b>	Number of newsletters published	8	8
<b>Stakeholder engagement</b>	Size of the project database	600	800+
<b>Events</b>	Number of attendees	950	4.500+
	National events	10	72+
	Catalyst Network events	/	15

## 6 Impact and Target Groups Reached

While the preceding sections document the dissemination activities and the channels through which they were delivered, this section synthesises their cumulative effect: who the CATALYST project reached, how deeply those audiences engaged, and what measurable impact the communication and dissemination effort ultimately produced. The analysis follows a reach – engagement – impact logic and is organised around the six target groups defined in the dissemination strategy.

### 6.1. From reach to impact: the dissemination funnel

CATALYST dissemination operated as a structured funnel. Broad-reach channels (website, social media, external events) generated awareness; the platform and the CATALYST Network converted that awareness into active engagement; and the Enable courses, Business Pilot Projects and follow-on funding instruments translated engagement into tangible, measurable impact. The figures below are drawn from the WP7 dissemination log, the CATALYST Platform analytics and the WP6 implementation evidence reported in D6.1 and D6.2.

Funnel stage	Indicator	Result
<b>Reached (awareness)</b>	Website visits; total event attendees; LinkedIn followers; social-media posts	75,667 website visits; 4,500+ event attendees; 1,240 LinkedIn followers; 495+ posts across channels
<b>Engaged (participation)</b>	Platform registrations; enrolled learners; Network participants; Specialisation cohorts	798 registered platform users; 1,844 enrolled learners; 394 Network participants; 51 specialisation-programme learners
<b>Impact (outcomes)</b>	Certificates; BPPs with adopted outputs; follow-on funding; external recognition	359 certificates; 15 Business Pilot Projects with tangible SME outputs; 3 follow-on funding instruments (EDIH INNOFEIT, Erasmus+, DBU); EU CoVE-report recognition (Jan 2026)

*Table 3: The CATALYST dissemination funnel — reach, engagement and impact indicators.*

## 6.2. Target groups reached, communicated and engaged

The CATALYST dissemination strategy defined six target groups. The table below sets out, for each group, the principal channels through which it was reached, the depth of engagement achieved, and the concrete conversion into project activities — demonstrating that dissemination was a segmented effort that moved each audience from awareness to active participation.

Target group	Reached through	Engaged	Converted into
<b>SMEs and professionals</b>	LinkedIn, SME-association newsletters (e.g. BVMW), national promo events, platform	Course enrolments, Network and Ask-an-Expert attendance, BPP host engagement	15 BPP host organisations; SME-targeted course completions; 3 follow-on funding instruments
<b>Students and high-school students</b>	University partners, hackathons, BPP student teams, social media	BPP project teams, hackathon participation, specialisation cohorts	17 secondary-school teams (Youth Ideas hackathon); BPP student teams; ~70% youth career-orientation signal
<b>Business and professional associations</b>	Chambers of commerce, sector networks, co-organised events	Event co-hosting, member-list dissemination, roundtables	SBCH-led GREEN Idea hackathon; association-channel promotion of open calls
<b>Educational organisations</b>	VET-provider networks, European Forum for Vocational Excellence, CoP for CoVEs	Train-the-trainer sessions, peer-CoVE exchange, conference presentations	Cross-CoVE collaboration; embedding of CATALYST resources in partner training catalogues
<b>Government, ministries and public enterprises</b>	National info days, ministerial meetings, public-sector outreach	Roundtable participation, policy-aligned dialogue	Galatsi Municipality public-sector BPP; national-level anchoring activities
<b>Researchers</b>	Academic partners, SDSN networks, journal/blog publications, conferences	Applied-research collaboration, publication contributions	Applied research projects (BPPs); CATALYST Prospectus contributions; SDSN-network reach (5,000+ followers)

Table 4: Target groups reached, engaged and converted into project activities.

### 6.3. Qualitative impact and external recognition

Beyond the quantitative reach, the CATALYST dissemination effort produced several forms of impact that confirm the project's visibility and influence extended well beyond the consortium:

- European-level recognition: CATALYST was included in the European Commission's January 2026 report “Advancing European Centres of Vocational Excellence (CoVE): An Analysis of Erasmus+ Projects” as a case study against which the EU benchmark for CoVE excellence is being defined.
- Follow-on funding: three independent funding instruments — EDIH INNOFEIT (CarbLog Bin), an Erasmus+ tool application (ESG Dashboard) and a DBU-supported pilot (Vertical Green Garden) — took forward outputs originating from a single CATALYST hackathon, evidencing impact beyond the project boundary.
- Operational adoption by SMEs: tools co-created in the Business Pilot Projects (such as the AUEB / AKTINA circular KPI framework and procurement checklist) were adopted at company level, demonstrating real uptake of project results.
- Youth career orientation: approximately 70% of the secondary-school participants in the Youth Ideas for Sustainable Buildings hackathon reported, after the event, that they were considering studies or a career in the field — a direct measure of impact on the future VET pipeline.
- International outreach: dissemination through partner networks such as SDSN Europe (nearly 5,000 followers) and SDSN Global (approximately 324,000 unique annual visitors), the Western Balkans Circular Economy Hub, and an international study visit extended CATALYST's reach beyond the five core countries to at least eleven additional European countries and beyond.

Taken together, these indicators confirm that the CATALYST communication and dissemination strategy achieved its core objective: it did not merely raise awareness of the project, but converted that awareness into measurable engagement and durable impact across all six target groups, at local, national and European levels, with effects positioned to continue beyond the funding period.

## Annex II – Recordings of communication and dissemination activities

## Final Logo

The official full fledged logo of CATALYST should be used in all instance related to this brand.

The CATALYST logotype is a symbolic representation of the brand. It should not be altered in any way under any circumstances.

**CATALYST**

Leading Sustainable Systems and  
Business Transformation

04

# Introduction

## About us

The main idea of "European VET Excellence Centre for Leading Sustainable Systems and Business Transformation" is to give support, create an educational offer to tackle personal and organisational development to embrace transformation in their companies and enable the process to re-think, re-design, co-create knowledge through joint-research projects. The main focus is addressing sustainability from an organisational, social and economic perspective.

Four Centres of VET Excellence will be established.

Platform for education, collaboration and networking will be set, uniting the four CoVEs.

Main beneficiaries:

- Professionals
- Managers
- SMEs

### Logo Color Variations

The logo is available in a variety of color combinations. They may be used interchangeably based on the background color. Do not recreate your own colors.

# Brand Colors

# CATALYST

European VET Excellence Centre for  
Leading Sustainable Systems and  
Business Transformation

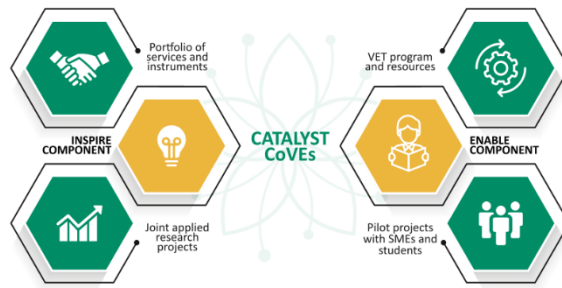

## About the CATALYST project

New VET skills are key to success in order to achieve the vision European economies and societies to become more sustainable, resilient, and better prepared for the challenges and opportunities of the green and digital transitions. The **CATALYST project “European VET Excellence Centre for Leading Sustainable Systems and Business Transformation”** is designed with strong vision and motivation to contribute to realisation of the European Green Deal and the new Industrial and SME Strategies.

The **main goal** is with the **establishment of united CATALYST Centre of Vocational Excellence in 5 countries** to give support, create an educational offer to tackle personal and organisational development, and to embrace transformation in SMEs, enabling and inspiring them to re-think and re-design their business models, co-creating and sharing between educational and business organisations.

The CATALYST projects addresses sustainability from an **organisational, social and economic perspective**. We will build the proposal on our mutual experience and vision of how professionals and industry can perform in a more sustainable way.

The project fosters innovation and applied knowledge in approaches of learning and tailor-made VET program via the **“Enable component”**, as well as support of SMEs to create sustainable businesses via the **“Inspire component”**.

[www.projectcatalyst.eu](http://www.projectcatalyst.eu)

## Project objectives

- Establish 5 Centers of Excellence (CoVEs) and CATALYST Network anchored the European VET eco-system.
- Develop 70 VET courses for up-skilling professionals and students (Enable component).
- Co-create and disseminate applied knowledge inspiring business-education partnerships involving students, professionals and SMEs (Inspire component).
- Create CATALYST Platform which will unite all CoVEs on European level.
- Implement VET trainings, pilot-project with SMEs and applied joint research projects in selected sectors according to the national S3.
- Raise awareness of the potential CATALYST CoVEs have and increase the demand and attractiveness of VET.

## Impact

The desired impact of the project is the established CoVEs to be ‘catalyst’ on national, regional and European level, ‘enable’ change and ‘inspire’ and transformation of individuals and SMEs toward more sustainable systems and societies. Activities are focused on learning opportunities, applied joint research projects, innovative training methodologies and tools and support for SMEs on relevant topics, where more than 5000 beneficiaries (professionals, students and SMEs) can benefit.

## The CATALYST project is developed and envision to:

- Champion** in business transformation
- Accelerate** high quality VET education
- Transcend** challenges of SMEs and professionals
- Applicable** knowledge and increased employability
- Lead** sustainable partnerships between educational and business organisations
- Yield** high returns from investments and effort made in education
- Shape** sustainable systems
- Treasure** competences for greener and circular economy
